*Dear Reader*

*Human activity has had a significant and immeasurable impact on the natural environment undermining its capacity to support life and sustain human development. Environmental issues have become some of the most visible and significant currently facing the global community and weigh heavily on the public consciousness.*

*Climate change, our reliance on fossil fuels and a decline in the abundance of natural resources are just some of the major issues facing mankind. It is imperative for the survival of the natural world and the continuation of human society that we find sustainable solutions to these problems which do not impede but rather contribute to human development. This is the aim of a wide range of Irish companies operating in the environmental sector.*

*The demand for sustainable solutions to a large number of environmental issues has created new business opportunities for Irish companies who have fully embraced the challenges of working in this area. As this has become an extremely competitive area, which requires truly innovative solutions, Ireland's environment sector has had to ensure it can provide unique, cutting edge products and services which can meet the demands of a global client base. This has been achieved through a collective approach by Irish companies working in partnership with each other the wider research community.*

***Dr. Robert Geraghty***  
***Senior Development Adviser***  
***Enterprise Ireland***

## Introduction

Enterprise Ireland's mission is to help Irish companies grow and to expand into overseas markets. The organisation works in partnership with Irish companies to help them compete in the global marketplace. Enterprise Ireland provides companies with information, technical assistance, networking opportunities and targeted assistance some of which is supported by financial incentives. To encourage innovation in Irish companies the organisation also provides a range of supports to Irish companies which are aimed at increased R & D spend, improving productivity and on training and knowledge-building. Companies are provided with a package of incentives to collaborate with the Irish research community on the development of new technologies.

Enterprise Ireland ([www.enterprise-ireland.com](http://www.enterprise-ireland.com)) is the gateway to Irish suppliers of world-class environmental services and products and can save key decision makers valuable time and resources by meeting with them directly to discuss their business needs, acting on behalf of these Irish companies to enhance their businesses, provide new solutions and present alternative suppliers.

Enterprise Ireland operates through a network of 36 international offices to support Irish companies as they grow and expand into overseas markets. The organisation works strategically with those companies which export environmental products and services. These companies are arranged into capability clusters and regularly profiled. Key target markets for each cluster are selected and supports aimed at establishing, or building on an existing, market presence are provided. Trade-shows, networking & partnering events & localised marketing collateral as well as building relationships with key buyer/purchasing groups/organisations serves to boost the international profile of Ireland's capability clusters and to win export business.

In seeking to attract the interest of international buyers and purchasing groups, Enterprise Ireland aims to win over key decision makers by providing up-to-date, consistent marketing information on relevant Irish suppliers and by bringing overseas buyers and influencers into contact with Irish suppliers of services and products. Enterprise Ireland's overseas Market Advisors liaise directly with overseas buyers to identify new products/solutions and present alternative suppliers.

## AQUA FACT INTERNATIONAL SERVICES LTD

### Description of Business

Aqua-Fact International Services Ltd is an environmental consultancy firm which specialises in the marine environment. Aqua Fact has a highly qualified team that is dedicated to a range of marine science topics from biology and oceanography to mathematical modelling. Aqua-Fact has pioneered the development and use of Sediment Profile Imagery in European waters and provides this technology worldwide.

### Products & Services:

- › Biological and physical/chemical sea bed and sea water surveys
- › Oceanographic surveys
- › Modelling studies
- › Diving surveys

### Key Customers

Government departments, local authorities and the private sector and completed projects include studies to determine impacts of dredge disposal, aggregate/gas/oil extraction, marine wind farms, aquaculture projects, harbour and marina developments and specialist biodiversity sea bed surveys.

**Standards & Certifications** ISO 9002

**Employees** 13

**Languages Spoken** French, Italian & Spanish

## AWN CONSULTING LIMITED

### Description of Business

AWN Consulting offers its clients specialist technical advice covering a range of disciplines including; environmental noise, air quality, soil, water, waste, environmental management and risk assessment. The emphasis is placed firmly on the provision of clear and concise guidance that ensures business requirements are fulfilled in compliance with appropriate regulations and in an environmentally responsible way. AWN use state of the art tools for measuring, modelling and assessing environmental issues in order to deliver solutions that are innovative, on time and within budget.

AWN provide technical support to over 500 clients and have an extensive track record of undertaking contract work for major infrastructure projects, blue chip industrial clients and property developers in Ireland, the UK, the Middle East, the USA and Continental Europe.

### Services

- › Integrated Pollution Control Licences
- › Oral Hearings, Public Enquiries
- › Risk Assessment & Consequence Analysis
- › Water Quality
- › Environmental Noise & Vibration
- › Seveso II Risk Assessment
- › Flora & Fauna
- › Modelling
- › Contaminated Land Risk Assessment & Soils
- › Wastewater Treatment
- › Architectural & Building Acoustics
- › Waste Management
- › Air Quality

### Key Customers

Environmental Impact Assessments: 2nd Liffey Valley Bridge EIS & Oral Hearing, Clifden Airport EIS & Public Enquiry, Ringaskiddy Waste-to-Energy Facility

IPC Applications: Intel Ireland Ltd Fab 24 Expansion, Alza Pharmaceuticals; Analog Devices

Intel Ireland Ltd, Pfizer Pharmaceuticals, Tory Island Airstrip, Naas Western Bypass, Kells Bypass, Dundalk Western Bypass Southern Link, Dundalk Racecourse, The Ward Business Park, Loreto Residential & Office Development, Bray Shopping Centre, Liffey Valley Shopping Centre Phase II and more.

## EHA SOFT SOLUTIONS

### Description of Business

EHA Soft Solutions provides the mai™ software platform to complement its training and consulting services in the area of environmental and safety management. mai™, which stands for measure, analyse and improve is a comprehensive Risk Management software tool for the Environmental, Health & Safety Manager who is determined to improve risk management and avoid unnecessary losses. EHA Soft Solutions help companies to achieve ISO standards and comply with the relevant regulatory bodies. The company was formed in 2002 to meet the needs of the pharmaceutical, medical device, manufacturing, technology, food and drink, healthcare and chemical sectors. The mai™ tools are designed for those organisations who want a simple but effective environmental risk register (Aspects and Impacts, a cornerstone of any Environmental Manual) and for managing waste streams and other emissions and monitoring from regulated industries e.g., Integrated Pollution Prevention and Control (IPPC).

### Products:

- › mai™ Environmental Risk Assessment
- › mai™ Safety Risk Assessment
- › mai™ Accident Report & Investigation
- › mai™ Manager
- › mai™ Waste Management
- › mai™ HACCP Food Safety
- › mai™ Occupational Health

### Services:

- › Installation and Support
- › Consulting and Software Development
- › Powerful Reporting Tools
- › Comprehensive Support for Modern Business Management
- › EHS training
- › 'Software-as-a-Service'
- › Web-Based Solutions

### Key Customers

Key sectors include food & beverage; pharmaceutical; medical device & manufacturing industries. EHA Soft's client list in the EU and USA includes Johnson & Johnson DePuy, Meteor, Honeywell, Kavlico, Shannon Aerospace, Britvic Ireland, Pernod Ricard and Pepsi Cola International.

**Quality Certification** ISO 9001: 2000; ISO14001; IPPC compliant

**Employees** 10

**Languages Spoken** Spanish, Portuguese

## ENVIRITECH ENGINEERING

### Description of Business

Enviritech Engineering offers the best renewable energy solutions by providing quality equipment and expertise at an affordable price. Enviritech designs geothermal heating systems, electric generation facilities such as Combined Heat & Power installations, Hydro, Solar, Wind and Diesel Generators. Enviritech concentrates on efficient & environmentally friendly alternative power sources together with water & wastewater treatment solutions.

### Products

- › Geothermal, wind, solar, biomass and heating systems
- › Hydro Energy
- › Heat Pumps
- › Wind Turbine Control & Installation Systems
- › Evacuative Tube Solar Water Heaters
- › Sludge and grass digestion and gasification plants
- › Bio-fuels
- › Insulation

### Services

- › Energy Consultancy
- › Building Energy Rating/Energy Auditing
- › Standards & Certifications:
  - › Approved by Sustainable Energy Ireland (SEI)
  - › EN14511
  - › EN 255
  - › EN 12976
  - › CE Marking

**Employees** 5

## EPS PUMPING & TREATMENT SYSTEMS LTD

### Description of Business

EPS was established in 1968 and is now Ireland's largest company supplying and installing pumping and treatment equipment solutions. The EPS group is involved in the design, manufacture, installation, commissioning, operation and maintenance of water & wastewater treatment systems and pumping solutions. EPS have built expertise in effluent treatment, water treatment, chemical & process pumping, rural water supply, domestic water and waste-water treatment and borehole pumping. With 5000m<sup>2</sup> facilities to build sophisticated plant and equipment and a treatment division specialising in the treatment of clear and solid liquids, EPS Ltd. are able to service large and small populations for the industrial, domestic and agricultural markets. The company has offices in Cork, Mayo, Laois, Kildare, Tyrone, Fermanagh and Glasgow.

### Products & Services

- > Effluent Treatment
- > Water Treatment
- > Packaged Treatment
- > Chemical & Process Pumping
- > Operation, Commissioning & Maintenance Packages
- > Rural water, domestic water and waste water supply
- > Borehole pumping, pressurisation units, pump assembly

**Processes include** Dissolved Air Flotation; Diffused Air Systems; Activated Sludge Processes; Anaerobic Treatment; Sludge Treatment – Aerobic and Anaerobic & Water Treatment

### Key Customers

EPS have the resources to cater for a range of customers in the municipal, commercial, industrial, retail, domestic and agricultural sectors.

### Standards & Certifications

ISO 9001:2000, ISO 14001:2004, CEEQUAL, UVDB™ Verify with Achilles, Irish Agrément Board, CE Marking, Ethos Partnership

## FINGLETON WHITE & CO LTD

### Description of Business

Fingleton White & Co. Ltd. are involved in many significant projects in the Irish energy sector. This company are recognised pioneers in Ireland's independent energy sector and have specific interests in power generation. They have been generating and selling electricity in the domestic market since 1981. The company was the first to sell Combined Heat and Power (CHP) electricity in Ireland and the first licensee from the Commission for Energy Regulation. Fingleton White & Co. Ltd. has a turnover in excess of €0m with up to 25% generated from export markets.

Fingleton White & Co. Ltd. designs, constructs and operates a range of infrastructural projects, e.g. a 16,000MW gas station, hydroelectric stations, wind farms, CHP facilities, waste to energy projects, effluent treatment facilities, water oil and gas pipelines, refrigeration systems, boiler houses, district heating and broadband communication networks. Fingleton White & Co. Ltd. operate 7 (5MW) Gas Turbine and 10 (1-3MW) Gas Engine based Combined Heat and Power (CHP) throughout Ireland.

### Products

- › Combined Heat & Power
- › Water & Waste Water
- › Effluent Treatment Facilities
- › District Heating
- › Renewable Energy including Biomass, Biogas, Wind and Hydro
- › Wind Farms
- › Boiler Houses

### Services

- › Consulting Engineering
- › Feasibility Studies for Energy and Cost Saving Projects
- › Waste to Energy Projects
- › Build, Own, Operate & Maintain Facilities
- › Energy Supply
- › Project Management
- › Engineer, Procure & Construct Projects

### Key Customers

Our key export markets are the UK and Continental Europe. We have ongoing relationships with many major multinationals including Dairygold, Diageo, Glanbia, Intel, Kerry Group. Wyeth.

**Employees** 40

### Contact Details

**Name** John Fingleton

## FLI ENVIRONMENTAL LTD

### Description of Business:

FLI is Europe's leading independent provider of Geosynthetic Lining Systems. Established in 1989, FLI is a specialist contractor for the supply and installation of geomembrane lining systems and the assessment and remediation of brownfield land and contaminated sites. This company has subsidiaries in the UK, France and Canada. FLI are also active in the business of contaminated land remediation, specialist civil contracting, landfill gas & leachate management systems and waste-water treatment.

### Products & Services:

- › Supply and installation of geomembrane lining systems
- › Assessment and remediation of brownfield land and contaminated sites
- › Contaminated Land Remediation
- › Geosynthetic Lining (Landfill, Mining, Industrial)
- › Landfill Gas and Leachate Management Systems
- › Stormwater Management
- › Specialist Civil Contracting
- › Wastewater Treatment

### Key Customers

Anglo American plc (mining), McCain Foods, Inco Limited (mining), Sisk, Roadbridge (Civil Contractors), Council / Local Authority (numerous), Property Developers (numerous)

### Standards & Certifications

- › ISO 9001: 2000 & ISO 14001: 2004 - UK
- › Member of the Chartered Institute of Waste Management (CIWM)
- › Construction Industry Training Board
- › Constructionline
- › The Construction Plant Hire Association (CPA)
- › Contractors Health and safety Assessment Scheme (CHAS)
- › Utilities Prequalification Scheme UVDB
- › Environmental Industries Commission – EIC

**Employees** 130

## PROJECT MANAGEMENT GROUP (PMG)

### Description of Business

Since 1973 PMG has delivered world-class planning engineering and environmental services. Today PMG, with over 1,600 personnel in worldwide offices, delivers a comprehensive portfolio of services to a wide range of public and private sector clients.

Recent projects have ranged from industrial strengthening in Eastern Europe, national sustainability and biosystems projects, masterplanning of major infrastructural projects, waste management, wastewater engineering and energy systems design and delivery.

### Products & Services

The projects PMG are involved in range from small consultancy studies to large-scale, complex, fast-track capital projects. PMG also provide environmental consultancy services in Ireland and internationally. Within PM Group the Planning & Environment division offers a comprehensive range of suitability services to both public and private sector clients in areas such as: Management Systems, Impact Assessment, Permitting, Auditing (Acquisition & divestiture Compliance), Risk Assessment and Wastewater/Air Systems Engineering. PM Group also provides services for companies wishing to determine their ecological and carbon footprints. In addition our energy division has supported many recent power plant projects with a range of services from site selection, planning and permitting to engineering, procurement and project management. More recently PM Group has provided permitting and engineering support to a number of biofuel manufacturing facilities.

### Key Customers

PM Group Work in the following sectors; Infrastructure, Energy, Biopharmaceutical, Food & Drink, ICT and Medical Technologies and has successfully built up business in industry, commerce and the public sector. PM Group also offers services to the European Commission, the World Bank, EBRD and other international agencies involved in environmental management, nature conservation and forestry.

Current major projects include: Natura 2000 Studies, Corrib gas Field Refinery, Lansdowne Road Stadium Redevelopment, Iarnrod Eireann New Commuter Rail Projects and permitting of multiple OCGT mid-merit power plants and biofuel plants.

**Standards and Certificates** ISO 9001:2000 & ISO 14001:2004

**Employees** 1600
